**Early diagnosis is critical in treating autism.**

**Limited and suspected behavior patterns examine and verify whether autism is suspected or not.**

**To get the most accurate results you need to keep a few rules while uploading video file:**

-  **The video file should be mp4.**
-  **Video duration must be between 1:30 – 2:00 minutes.**
-  **It's important that the camera doesn't move during  
The shooting.**
-  **It's important to watch the baby's face during video  
Shooting.**
-  **Put a toy next to the baby to attract his attention.**
-  **Call the baby's name 10 times a minute.**

**If the video takes a minute and a half,  
then call him 15**

**times and so on respectively.**

-  **Talk to the baby to see his reaction.**

**That's all for now !**

**Diagnostic results will be sent soon.**
